Summary

Machine learning engineer with 6 years building and operating ML and LLM systems in production.

Experience

Senior ML Engineer, Northwind Analytics (2021 - present)

- Designed prompt pipelines for large language model features and ran offline evaluation suites.
- Deployed retrieval-augmented generation (RAG) services on AWS using Docker containers.
- Built REST APIs with FastAPI for real-time model serving.
- Set up monitoring dashboards to detect model drift and quality regressions in production.
- Collaborated with product, data, and security teams on launch reviews.

Machine Learning Engineer, Contoso Retail (2018 - 2021)

- Trained PyTorch ranking models and deployed them to production on Kubernetes.
- Wrote SQL feature pipelines over PostgreSQL warehouses.

Projects

- Shipped an end-to-end internal knowledge assistant using RAG and vector search.
- Built an evaluation dataset and benchmark suite for answer quality.

Skills

Python, PyTorch, SQL, Docker, Kubernetes, Git, GitHub Actions CI/CD, pytest

Certifications

AWS Certified Machine Learning - Specialty (2024)

Education

B.S. Computer Science
